Census of England.

The first volume of the census for England, which has just been issued, shows the numbers and distribution of the people in the several parishes and places. An abstract of the returns was published last year; a careful revision of them shows that on the 8th of April, 1861, the popula-tion of Eugland and Wales, with the Isle ariment there was a phrase, first brought who will probably soon return to their homes, viz.: Sergeant Thomas Smith, Prihomes, viz.: Sergeant Thomas Smith, Privates Delow Smith, Charles Webster, George
Woodruff and Charles Nichols. Those
from Company K discharged were Simon
Kennedy, Cyrus McCabe, Nathan P. Robvery unjust and it gave me offence, but I

must confount that on the 8th of April, 1861, the population of Eugland and Wales, with the Isle
of Man and Charles discharged the seamen in the ports, rivers and creeks—that
is to say, all the persons in the kingdom—
amounted to the number of 20,200,671, dom to above 19,000,000. The increase o England and Wales alone, sus of 1851, has been 2,138,615, notwithpersons emigrated from the United King-dom, of whom it is calculated that 640,316 1861 was 978, 371, to which the Irish returns, Thames. In England and Wales 124, and other principal charitable institut Islands, which had previously been in ing, has, in the ten years under review hardly maintained its number, except by an increase of the military force. In a few months the puplication of the census of England will be completed by the issue of tables of the ages, occupations, birth-places, &c., of the people, with a report of

the general results.
